RAJIV R. NAIR

PROFILE

I have been working for over nineteen years across the finance, construction, automobile and telecom domains and have played diverse business and technical roles ranging from hands-on development to helping our clients elucidate new requirements, building proof-of-concept pieces and analyse their impact on existing applications. I have also been responsible for design, infrastructure and performance on my projects.

SKILLS

Recent Experience: Java, Kotlin, NodeJS, Android Native, SQL, Python.

Cloud: AWS, some experience with GCP and DO.

I have been doing Full Stack / DevOps roles for the past few years. I have worked on multiple web and mobile applications across the whole stack from the databases to the front-end. My most recent experience is with *Java* and *Kotlin, Android*, *Spring Boot*, *NodeJS* services, *Python* scripting and *Postgres*. Infrastructure is managed via *Terraform* on *AWS*.

EXPERIENCE

PRINCIPAL ENGINEER/CTO, ACQUAA; BENGALURU — 2022-PRESENT

I'm working on building a next-gen platform designed to drive efficiency and scale in water distribution. ***Tech***: ***Kotlin, Java, Spring Boot, Terraform, Postgres, AWS.***

PRINCIPAL ENGINEER, SOCASH; BENGALURU/SINGAPORE — 2017-2022
